(54) Title: HYGIENE CAP FOR CAN

(57) Abstract: The present invention relates to a hygiene cap detachably provided for a can having a lid formed with an outlet and an opener for opening the outlet, the hygiene cap comprising a cap body interposed between an outer surface of the lid and the opener and rotating about the lid; and a cleaner attached under the cap body and cleaning the outer surface of the lid as the cap body rotates. Thus, the present invention provides a hygiene cap for a can, which minimizes contaminants of the can while it is produced, distributed and taken in custody, and allows a user to easily clean an outlet of the can and then drink a beverage from the can.
